PROJECTS

To-do List - Application   *July-2024*

- Built a responsive to-do list app using React with task management features.
- Managed state with Context API/Redux and implemented local storage.

Crud - Application   *Jun-2024*

- Created a React.js app with create, read, update, and delete features.
- Integrated RESTful APIs for data handling.
- Deployed on Netlify.

ColorShower - Application   *Aug-2024*

- Developed a dynamic color shower app with React.js, allowing users to explore and select color palettes.
- Utilized Bootstrap for responsive design and styling, ensuring a seamless user interface.
- Implemented state management with React hooks for real-time color updates.
